What is the most probable y sequence for the given x sequence?

Question

How to solve the unsupervised learning problem for HMM?

Expectation Maximization

E-Step

Find for each input its membership

M-Step

Update the model parameters

Hard EM for HMM

E-Step

For each input sequence, find its most probable output sequence.

This is the decoding procedure!

Hard EM for HMM

M-Step

Update the model parameters, based on the training sequence pairs.

This is the supervised learning procedure!

E-Step

Run Viterbi, and then collect counts from each instance

M-Step

$$a_{u,v} = rac{\mathrm{count}(u,v)}{\mathrm{count}(u)} \qquad b_u(o) = rac{\mathrm{count}(u
ightarrow o)}{\mathrm{count}(u)}$$

E-Step

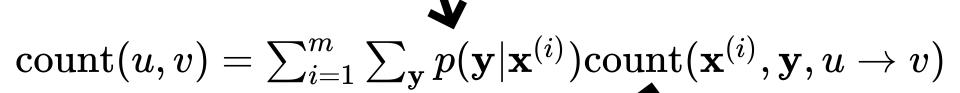

Run some algorithm to collect fractional counts from each instance

M-Step

$$a_{u,v} = rac{\mathrm{count}(u,v)}{\mathrm{count}(u)} \qquad b_u(o) = rac{\mathrm{count}(u
ightarrow o)}{\mathrm{count}(u)}$$
